Pensar Medical™ *Negative Pressure. Positive Results.*

Skilled Nursing Facility (SNF) and Nursing Facility (NF)

Use of MicroDoc® Single-Use Negative Pressure Wound Therapy System

When a physician orders a dNPWT system for a Medicare beneficiary who is receiving care in a SNF (place of service 31), the SNF consolidated billing systemi requires the SNF to purchase and apply the dNPWT system. If the SNF requests a physician or other qualified healthcare professional (QHP) to purchase and apply the dNPWT system, the physician/QHP and SNF should execute a contract that allows the physician/QHP to bill the SNF rather than the Medicare program.

When a physician orders a dNPWT system for a Medicare Part B-covered beneficiary who is receiving non-skilled care in a nursing facility (place of service 32), the NF is not required to purchase the dNPWT system. The physician/QHP may purchase, apply, and bill the Medicare Part B program for the dNPWT system.
